PRINCIPAL POCHE MINES

ARE CONSOLIDATED

A merger which will include thirty-six well located claims at Poché has been effected. The consolidation will include the Golden Prince, Golden Silver Prince, John D. Treasure Hill and Monarch properties. George E. Cox, general manager of the Golden Prince, now at Salt Lake City, announces that the merger property will have one and a quarter miles on the great Prince dyke system, the great mineralized agency of the district. A new company will take over the various properties and the first president will be M. A. Low of Topeka, with H. P. Clark of Salt Lake, John Pingree of Ogden and Mr. Cox associated as directors.

Mr. Cox says that the ores already developed on the 500-foot level show the Golden Prince to be one of the great mines of the district. The shaft is down 535 feet and preparations will be made at once to secure greater depth. Mr. Cox says that things are looking better in Poché than for years.

DOCTORS HELPLESS AGAINST INFANTILE PARALYSIS

"The medical profession of the world is still handicapped by the scourge of infantile paralysis."

This statement was made at the meeting of the Chicago Neurological society by Dr. H. E. Robertson, assistant professor of pathology in the University of Minnesota.

"We are up against it," said Dr. Robertson. "We have not been able to cultivate the germs in laboratories. We cannot learn anything from analysis. We cannot even diagnose the disease because the first certain symptom is the paralysis of the patient."

"The disease attacks the strongest and most active children. It is not confined to infants. Many victims are adults. The high fatality is caused by reaching the acute stage in three or four days. Up to that time the symptoms must indi-

cate any infectious malady. There are no definite symptoms, and the first warning the practitioner has is the paralysis of his patient."
